

# Participants Needed! FOR BREAST CANCER RESEARCH

We are looking for **breast cancer survivors** to take part in a new study to characterize upper limb movements in functional tasks.

## ELIGIBLE PARTICIPANTS MUST:

- Be between 18 and 70 years old
- Have had **mastectomy** OR **reconstructive surgery** for breast cancer more than 6 months ago
- Be able to safely participate in physical activities
- Be available for 1 session of approximately 2 hours at our laboratory at the University of Saskatchewan

You will be compensated for your time.

Participants will be asked to complete a number of arm-focused tasks while your motion and muscle activity are measured with surface sensors. Ultrasound images of your shoulder will also be taken. You will also be invited to participate in an optional phone interview about your post-treatment experiences.
