

CO-DEVELOPING A PATHWAY TO REDUCE POSTOPERATIVE DELIRIUM IN OLDER PATIENTS

Department of Anesthesiology University of Saskatchewan

We are looking for volunteers to participate in a study to co-develop a multidisciplinary and patient-centered pathway for older patients at risk of postoperative delirium.

As a participant in this study, you would be asked to take part in a facilitated workshop lasting 2-3 hours.

Participation is voluntary. An honorarium will be provided for your time.

For more information about this study, or to volunteer for this study, please contact:
